

INVESTOR PITCH DECK

Building the timeline. of quantum & AI.

An NHI-first IGA, Agentic AI and quantum-ready engineering company. Raising capital to scale a portfolio of shipping enterprise products.

FUNDING ROUND

Seed / Pre-Series A

Use of funds: Engineering · GTM · R&D · Compliance

Round size, valuation and terms shared under NDA on first qualified call.

EXECUTIVE SUMMARY

An R&D engine. A shipping product company.

QWatch is an R&D-led product company shipping enterprise software at the intersection of identity governance, agentic AI and quantum computing. We build, own and operate four flagship products and serve enterprises globally.

CATEGORY COLLISIONS

100%

R & D IN QUANTUM

OPC

CAPITAL-EFFICIENT

THE PROBLEM

Three structural shifts. One blind-spot.

Three structural shifts are colliding inside the enterprise — and existing vendors solve them in silos.

01

Non-Human Identities are exploding.

Service accounts, bots, agents and machine workloads now outnumber humans by orders of magnitude — legacy IGA wasn't built for them.

02

Agentic AI is moving into production.

Reasoning agents act on behalf of users with their own credentials, tools and tokens — without a governance layer.

03

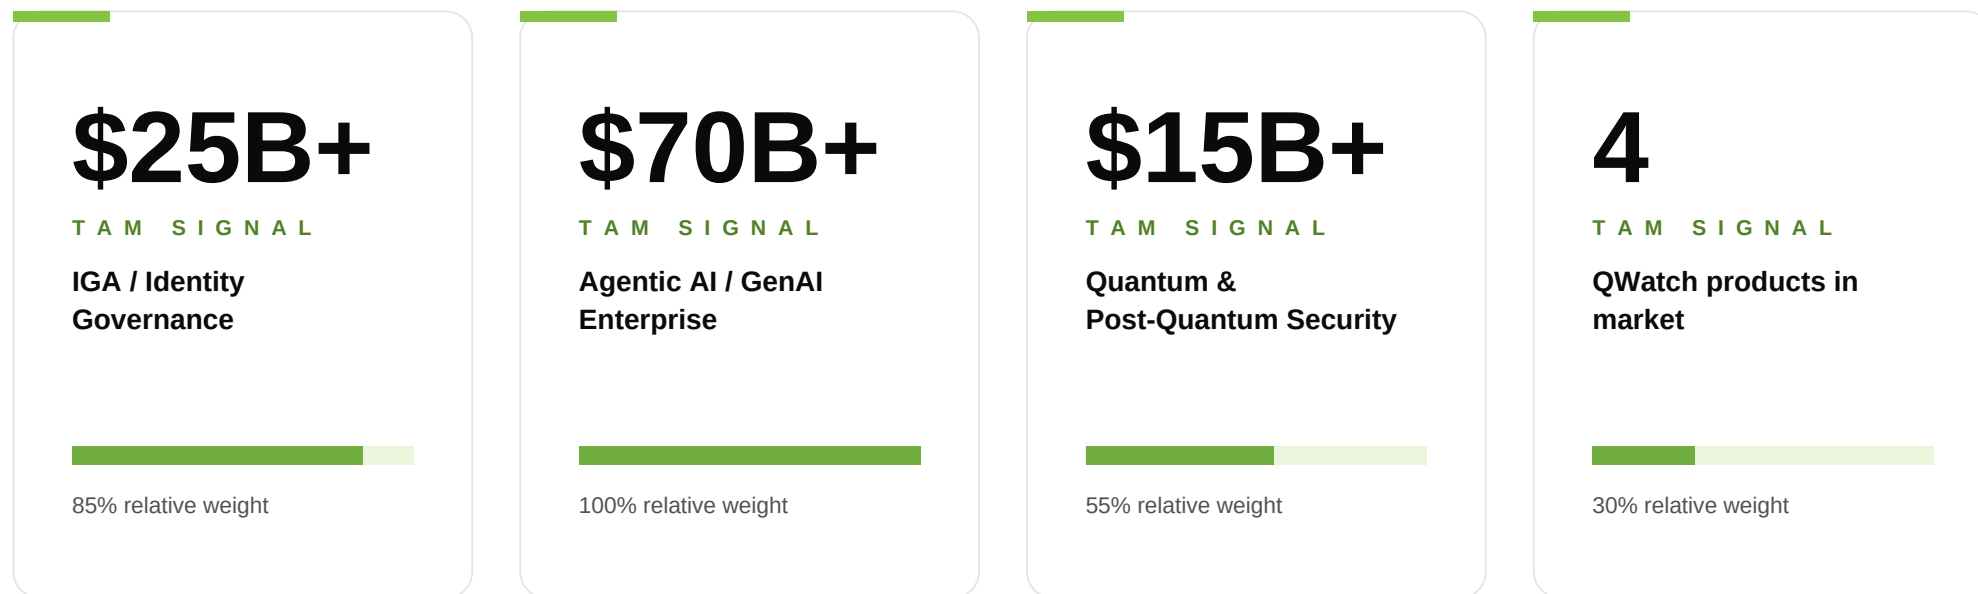

Quantum threatens current cryptography.

Public-key crypto must transition to post-quantum standards. Most enterprise stacks are not quantum-ready.

MARKET OPPORTUNITY

Three category winds. One company.

We sit inside three of the fastest-growing enterprise software categories of the decade.

Figures are directional industry estimates — used for sizing, not committed forecasts.

OUR SOLUTION

A portfolio — not a feature.

QWatch ships products — not consulting hours. Each product is a wedge into a major enterprise spend category, supported by a shared R&D engine.

IDENTITY

ACTORISS

NHI-First IGA — human + machine identity governance, certification, lifecycle, audit-ready compliance.

AI

DSONAI

Agentic AI platform — reasoning agents, structured outputs, governed deployment.

AI WORKFLOW

LabForP

Prompt Forge — execution memory, prompt sequences, team vaults, model connectors.

SOCIAL

Q-IDEA

Social platform for consumers and enterprises — discovery, conversations, collaboration.

PRODUCTS

Four products. Live in market.

Four flagship products in market — each addressing a distinct category, each engineered, owned and operated by QWatch.

Social · Consumer + Enterprise

Q-IDEA

Social platform unifying discovery, conversations and collaboration in one connected experience.

→ LIVE IN MARKET

NHI-First IGA

ACTORISS

Human + Non-Human Identity Governance — service accounts, bots, AI agents, machine workloads.

→ LIVE IN MARKET

Agentic AI Platform

DSONAI

Enterprise reasoning agents, structured outputs and governed deployment.

→ LIVE IN MARKET

Prompt Forge

LabForP

Execution memory for AI work — prompt sequences, vaults, connectors, persisted runs.

→ LIVE IN MARKET

W H Y N O W

Tailwinds aligning across identity, AI and quantum.

The category collisions of 2025–2030 are the entire investment thesis.

AI Agents = identities

CISOs demand governance over what AI agents can do, see and sign.

NHI is the new attack surface

Most breaches in 2024–2025 trace to abused machine identities.

Agentic AI in production

Audit, orchestration, prompt provenance and execution memory required.

Quantum mandates arrive

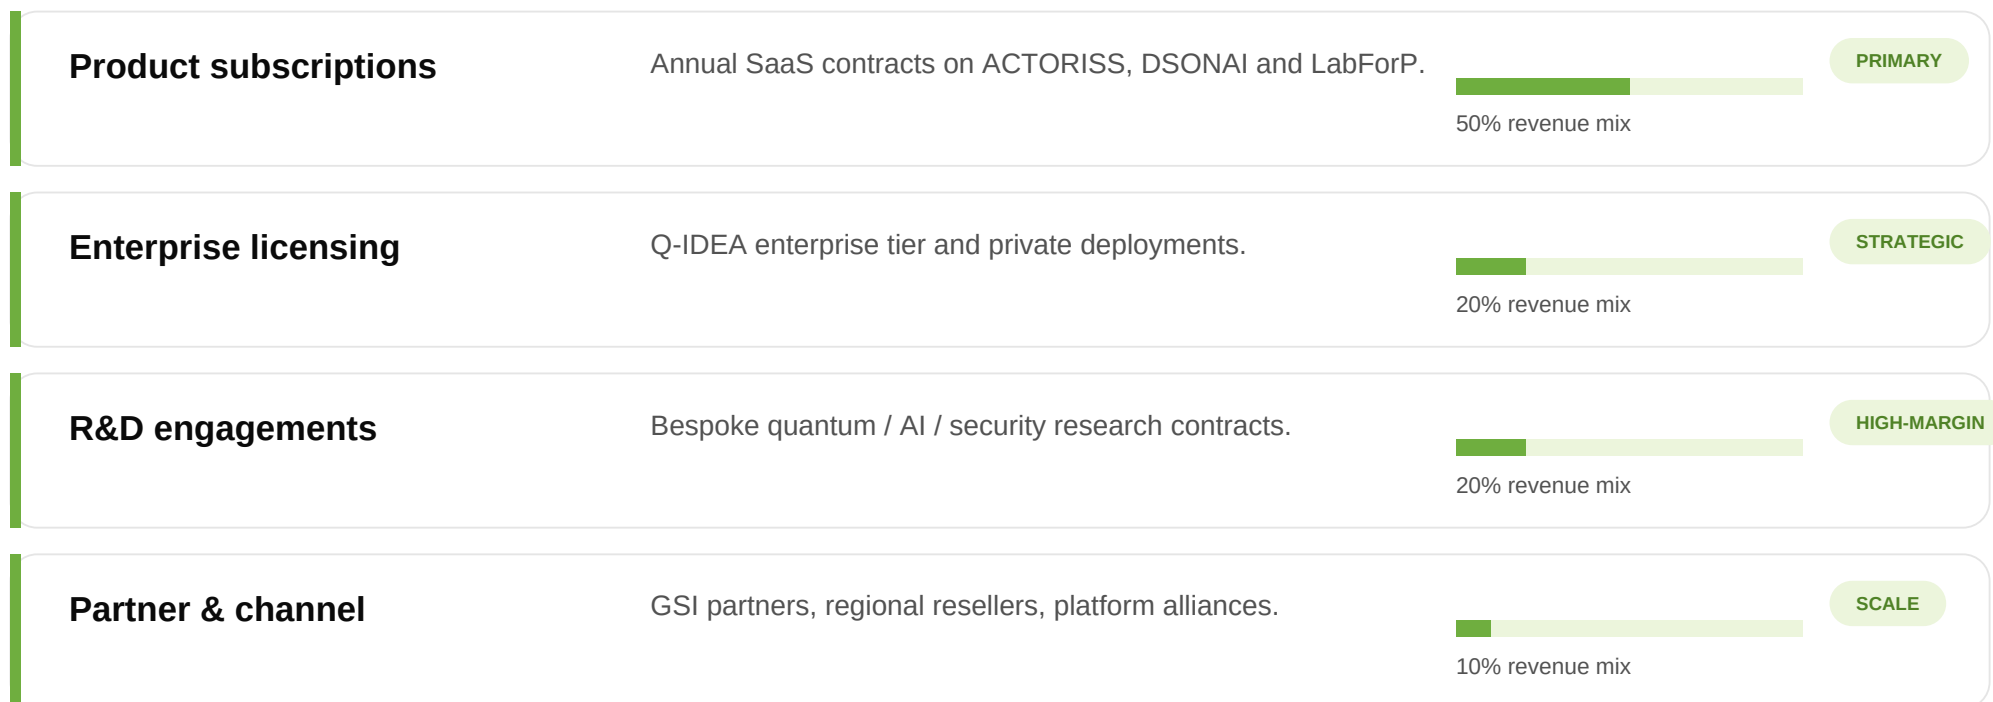

Regulated industries legislate post-quantum migration timelines.

B U S I N E S S M O D E L

Multi-product. SaaS-led. Services-amplified.

A SaaS-leaning, multi-product revenue model — with engineering services as an on-ramp into long-term product adoption.

T R A C T I O N & R O A D M A P

Foundations shipped. Now we scale.

Foundations are in place. Capital accelerates GTM and category leadership.

S H I P P E D

- Four products live in market.
- ACTORISS — NHI-first IGA architecture.
- DSONAI — agentic AI deployments.
- LabForP — Prompt Forge in private use.
- Q-IDEA — consumer + enterprise tiers.

N E X T 1 2 M O N T H S

- GTM hires across IGA + Agentic AI.
- Design partner program for ACTORISS.
- ISO 27001 / SOC 2 readiness.
- Channel + GSI partnerships.
- Post-quantum readiness modules.

1 8 – 2 4 M O N T H S

- Series A scaling.
- Geographic expansion — US, EU, GCC.
- Vertical playbooks (BFSI, Healthcare).
- Quantum-secure identity research.
- Marketplace + ecosystem integrations.

COMPANY & TEAM

Capital-efficient. Senior. Operator-led.

QWatch operates as a focused One Person Company (OPC) — engineered for capital efficiency and clear governance — with a senior engineering and research bench.

Founder-led

Operator-engineer at the helm. Single accountability for product, R&D and capital allocation.

Engineering bench

Multi-discipline team across security, AI/ML, full-stack and cloud.

Research roots

Active R&D in quantum-ready algorithms, post-quantum cryptography and agentic AI.

Operating model

Lean cost base. Remote-first. Governance and compliance baked in by design.

THE ASK

Seed / Pre-Series A.

We are raising to scale GTM, expand engineering and capture category leadership in NHI-first IGA and Agentic AI before the market consolidates.

Open to strategic and institutional investors. Round size, valuation and instrument structure shared under NDA on first qualified call.

USE OF FUNDS

Where every dollar goes.
