CYBER POSTURE

ABOUT

An R&D engine. A shipping product company.

QWatch Digital Security Innovations is an R&D-led product company. We build, own and operate enterprise software across identity, AI and quantum-ready engineering. Our work is guided by security-first thinking, deep research roots and a portfolio approach to product-building.

OUR THESIS

We don't pick a single frontier. We operate across all of them — and our products are how we ship that thesis into the market.

R&D-led

Research roots inform every product we ship.

Security-first

Zero-trust thinking baked into the architecture.

Portfolio approach

Multiple products, shared engineering bench.

Quantum-ready

Designed for the next decade of cryptography and compute.

C A P A B I L I T I E S

Future-proof engineering, end to end.

A full stack of future-proof engineering — across the frontiers that matter for the next decade of enterprise software.

01 Quantum Computing

Quantum-accelerated algorithms, post-quantum cryptography, hybrid classical-quantum frameworks.

02 Generative & Agentic AI

Production-grade agentic AI, fine-tuned LLMs, RAG, multi-agent orchestration, reasoning pipelines.

03 AI & Machine Learning

Computer vision, time-series forecasting, anomaly detection, recommendation engines.

04 Mobile & Web Apps

Native iOS, Android and cross-platform. Modern web — React, Next.js, full-stack TypeScript.

05 Cybersecurity & Identity

NHI-first IGA, zero-trust architectures, machine identity security, secure-by-design.

06 DevOps & Cloud

Cloud-native architectures, infrastructure-as-code, CI/CD automation, observability.

PRODUCT

PRODUCT 01

Q-IDEA

Social Platform · Consumers + Enterprise

A social platform built for consumers and enterprises — bringing discovery, conversations and collaboration into a single connected experience.

WHAT IT DOES

- Unified consumer + enterprise experience.
- Discovery and content surfaces engineered for engagement.
- Enterprise-grade controls for organizational deployments.
- Built on the same security and engineering foundation as the rest of the QWatch portfolio.

PRODUCT 02

ACTORISS

NHI-First IGA · Human + Non-Human Identities

An NHI-first Identity Governance & Administration (IGA) platform that governs both human identities and Non-Human Identities (NHI) — service accounts, bots, AI agents and machine workloads.

WHAT IT DOES

- NHI-first design — service accounts, bots, AI agents, machine workloads.
- Human identity governance — joiner / mover / leaver, access certification.
- Role engineering, lifecycle management, audit-ready compliance.
- Designed for the agentic-AI era: machine identities are first-class.
- Integrates with existing IAM, SIEM and HRIS systems.

PRODUCT 03

DSONAI

Agentic AI Platform · Enterprise

An agentic AI platform that turns enterprise workflows into intelligent, AI-native systems — reasoning AI agents, structured outputs and governed deployment at scale.

WHAT IT DOES

- Reasoning AI agents that act inside enterprise workflows.
- Structured, schema-validated outputs for production reliability.
- Governed deployment — observability, evaluation, guardrails.
- Multi-model and multi-provider — vendor-agnostic by design.
- Built for regulated environments: auditability, traceability, control.

PRODUCT 04

LabForP

Prompt Forge · AI Execution Memory

PROMPT FORGE — the execution memory for AI work. Ordered prompt sequences, team vaults, model connectors, browser capture and persisted sequence runs.

WHAT IT DOES

- Ordered prompt sequences with persisted execution memory.
- Team vaults for shared, governed prompt libraries.
- Model connectors across providers — bring your own keys.
- Browser capture for context-rich AI workflows.
- Audit trail of every run — ideal for regulated AI work.

S E R V I C E

PromptU — expert prompt engineering.

PromptU is an expert prompt-engineering service for teams adopting Generative AI — curated prompt sets, workflows and team-grade governance.

Curated prompts

Hand-engineered prompt assets for your domain.

Workflows

Repeatable AI workflows wired into your tools.

Governance

Team-grade controls, review and lineage.

Onboarding

Hands-on enablement for your AI champions.

R & D · E N G A G E M E N T

A research lab with a delivery engine.

We operate with a strong R&D foundation — exploring quantum algorithms, pushing the edge of generative and agentic AI, and translating that research into shipping products.

R & D FOCUS

- Quantum-accelerated algorithm research.
- Post-quantum cryptography & quantum-ready architecture.
- Agentic AI orchestration, evaluation & governance.
- Non-Human Identity governance models.
- Applied LLM systems — RAG, multi-agent, structured outputs.
- Secure-by-design engineering across portfolios.

VISION

We sit at the intersection of quantum computing, security and intelligence — engineering software that is ready for the next decade, not the last one.
